

FRAMEWORK SCHEDULE FOR ACCREDITATION OF THE EETS PROVIDER

ANNEX NO. 4 OF THE EETS DOMAIN STATEMENT

This document forms an annex to the EETS Domain Statement. The framework schedule follows the prescribed procedure of the EETS Provider Accreditation and reflects the time sequence for the fulfillment of individual tasks during Accreditation. The framework schedule serves as a guide for Applicants.

It is the duty of the Applicant to process their own expected schedule and submit it to the Toll Collection Administrator as an annex to the Application for Accreditation. The Toll Collection Administrator will check the Applicant's expected schedule as part of the assessment of the Application for Accreditation only in terms of compliance with the conditions in Sections 1 to 4 below.

The Applicant for Accreditation is required to follow the following principles when preparing its expected Accreditation schedule:

1. Maintain the minimum structure, sequence and continuity of the tasks listed in the framework schedule; this is without prejudice to the right of the Applicant to extend the schedule to include other tasks which, in the opinion of the Applicant, are expedient and/or necessary to achieve the objectives;
2. Maintain the minimum duration of certain tasks as highlighted in the schedule in yellow, which the Applicant may not shorten;
3. Not to exceed the maximum deadline for the processing and submission of the Technical and Operational Concept, which is 6 (six) weeks from the effective date of the Future EETS Contract;
4. not to exceed the deadline for completing the Accreditation procedure, which is a maximum of 12 (twelve) months after the effective date of the Future EETS Contract,
5. Subject to the compliance with the condition under Sections 2 and 4 above, the Applicant has no other restrictions when developing the expected schedule.

The schedule has a non-binding informative nature, which serves the Toll Collection Administrator as a preparation for organization of the tests of the Interoperability Constituents and for determining the order of the particular EETS Providers when taking the tests of the Interoperability Constituents, especially if the tests are to be taken simultaneously for several EETS Providers at the same time.

The framework schedule is given on the following page. Its graphical representation is simplified (Each month is divided into 4 equal sections, which do not exactly correspond to a weekly interval); the data indicated in the "Duration" column is authoritative for the processing of the draft schedule.

Combined marking of a task, e.g., 4 (four) weeks in yellow followed by 2 (two) weeks in grey, means that the Toll Collection Administrator expects the task to be completed in 6 (six) weeks, but the Applicant can reduce the task up to 4 (four) weeks, but not less.

Document	Issued / Version	Status	Approved by, on
04_Framework schedule for the Accreditation procedure_eng	28.07.2022 / 1.0	Final version for publishing	Board of Directors, 19.07.2022
